**Valiyev G.N. Farg‘ona politexnika instituti t.f.d.; professor**

**Abstract:** Trikotaj materiallari sifatini oshirish usullari tarmoqsi, tekstil sanoati uchun muhim masala hisoblanadi. Bu maqolada trikotaj materiallarining sifati va keyingi texnologiyalar bo‘yicha yangi usullar o‘rganilgan. O‘z viloyatimizda trikotaj materiallarining sifatini oshirishda foydalaniladigan eng eng muhim usullar tahlil qilindi va ularga oid ba‘zi mosliklarni taklif etdi.

**Kalit so‘zlar:** tolalarni tanlash, ip konstruktsiyasi, bo‘yash va pardoqlash, trikotaj texnikasi, sifat nazorati, innovatsiyalar, tekstura, matoni parvarish qilish, chidamlilik, ishlash samaradorligini oshirish.

**Abstract:** The method of improving the quality of knitted materials is an important issue for the textile industry. This article explores the new methods for the quality of knitted materials and further technologies. The most important methods used in improving the quality of knitted materials in our region were analyzed and some adaptations were proposed.

**Keywords:** fiber selection, yarn construction, dyeing and finishing, knitting technique, quality control, innovation, texture, fabric care, durability, performance improvement.

### **Kirish:**

Trikotaj materiallarining sifatlarini oshirish usullari so‘rovlarini o‘rganib chiqish va rivojlantirish, tekstil sanoati sohasida innovatsion mahsulotlarni ishlab chiqishga imkoniyat yaratadi. Bu maqolada trikotaj materiallarining sifatini oshirish usullari haqida umumiy ta‘rif beriladi va qo‘llaniladigan asosiy usullar keltirib o‘tildi.

Maqola davomida trikotaj materiallari sifatini oshirish usullari o‘rganilishiga oid laboratoriya testlarining o‘zaro taqsimlanish usullari va analizlar tahlil qilindi. Trikotaj materiallarining sifatini oshirishda keng ko‘lamli laboratoriya imkoniyatlaridan foydalanish mahsulot sifatini oshirishda katta ahamiyatga ega ekanligi ko‘rsatildi.

### **Natijalar:**

Trikotaj materiallarining sifatini oshirishda laboratoriya testlaridan olingan natijalar ma'lum etdi. Xulosa bo'limida trikotaj materiallarining sifatini oshirish usullari va ularning texnik mahsulotlarga ta'siri tartibi bilan maqola oxirigacha ko'rsatmalar o'tkazildi. Results:

1. Laboratoriya testlarini o'rganish natijalariga qarab, trikotaj materiallarining sifatini oshirish uchun ikki asosiy usul aniqlik bilan aniqlik bilan aniqlik bilan aniqlik bilan qo'llaniladigan.

2. Testlar natijalariga asosan, kimyo bo'yicha ilovalarni qo'llash usullari trikotaj materiallarining sifatini oshirishda eng samarali usul hisoblanadi.

3. Sifatini oshirish usullarini taqdim etilgan holatda, trikotaj materiallarining sifatini (masalan, to'qima qonuniyati, rangning o'zgarishi, suv va moy namliklarni saqlashi) oshirish uchun eng yaxshi usullar muayyanlandi.

4. Laboratoriya testlarining amaliyoti natijalariga qarab, trikotaj materiallarining sifatini oshirishda yangi tekshirish usullarini qo'llash yoki mavjud usullarni rivojlanishga yoneltishning ahamiyati ta'kidlandi.

5. Uzlüksiz laboratoriya testlari va analizlar trikotaj materiallarining sifatini oshirish usullarini aniqlik va effektivlik bilan tanlashda katta imkoniyat yaratishda muhim ahamiyatga ega.

Bu ma'lumotlar, trikotaj materiallarining sifatini oshirish usullari bo'yicha o'tingan laboratoriya testlaridan olingan natijalarni tahlil qilish uchun yengil va yorqin yordamchi ma'lumotlar taqdim etadi. Trikotaj materiallari sifatini oshirish usullari so'rovlariga oid tahlil natijalari alohida qarorlarni taklif etilgan. Keng ko'lamli laboratoriya testlari va analizlar materiallar sifatini oshirishda muhim ahamiyatga ega. Bu maqola bu so'rovlar ustida ishlashda qulayliklar va kutilgan natijalarni ta'kidlaydi.

### **Conclusion:**

Trikotaj materiallari sifatini oshirish usullari tarmoqsi tekstil sanoati sohasida innovatsion rivojlanishni ta'minlashda katta rolini o'ynaydi. Ushbu maqola trikotaj materiallarining sifatini oshirishda laboratoriya testlari va analizlarning ahamiyatiga e'tibor qaratadi va ularning ustida o'rganilayotgan yangiliklarni ta'kidlaydi. Nazarda tutib, trikotaj materiallarining sifatini oshirish so'rovlari muhimdir va ularni yechib berish uchun keng qamrovli laboratoriya imkoniyatlardan foydalanish tavsiya etiladi.
