It is true that, nowadays most language learners are suffering from not enough high level of listening and speaking skills, while other foreign language learners doing easy for speaking and listening. There are strong reasons behind my confidence, why it is impossible increasing level of English even in long term study. Now we discuss both causes and solutions to this issue. Firstly, more and more pupils tend to be learning foreign languages in their early ages, but unfortunately parents cannot help them to choose right way and sometimes teachers also. They may choose best teacher but they don't control tasks doing or another way some teachers cannot teach them in sufficient way. How? They teach them with grammar rules, every day they give them new words in order to increase their vocabulary. But one and big issue is that they don't teach them how to practice the information on their mind.

Coming from my own experience, lots of time I come across such kind of methods. What I mean is that, for instance, we can get as an example tutors one General English lesson, teacher provide students with completely grammar with its secrets, teachers are learn vocabulary by heard to students and they asked only what they teach not on language with lots of practice. At that time, pupils used to be hungry to practice, but teachers don't choose the practice way. It is one of the wrong method teaching General English. General English does not exist only with grammar rules, structures or with topic or nontopic vocabularies. GE is the whole language. It consists of all skills: listening, reading, writing and speaking. (I can give you advice best book to increase GE is **SOLUTIONS**). Secondly, the big pain is teachers cannot choose appropriate authentic materials for their students, they only choose popular one among school or learning centers) you know, there are tons of book which is unnecessary for whom just begin to learn languages. Best solution to these useless method is choosing write scheme of learning language. Pupils not ought to disappoint with such kind of boring ways.
